**ADDITIONAL MINI-MiL® INFORMATION**

**Please read before wearing.** The popularity of the "barefoot" running movement continues to rapidly expand as athletes from all sports begin to shed their traditional training shoes for footwear that closely mimics the barefoot running experience. Being both flexible and low to the ground, the MINI-MiL® provides a more natural gait of movement and the sensation that one is actually barefoot. The thought process behind minimalist footwear is to reduce initial joint impact by creating a shoe that allows for a more natural foot motion - ultimately increasing running performance and decreasing the risk of injury.

If you are wearing the MINI-MiL® for the first time or have not previously trained in minimalist footwear, we encourage a very gradual transition as you will be using new muscles in the feet and lower legs. Even if you’re a veteran runner who is used to running in lightweight shoes, you should take caution when transitioning to a more minimalist type of shoe or boot. You’re bound to engage muscles in your feet, lower legs and core differently than you’re used to, partially because you’ll be landing less on your heel with a braking angle and more near your midfoot with a more level landing. Don’t expect to put on the MINI-MiL® and run a long distance right away. You need to slowly build up your mileage with this boot. We recommend wearing the MINI-MiL® for 1 – 2 hour intervals the first few weeks. Gradually increase usage as your body strengthens and adapts.

WHEN YOUR FEET NEED A MACHETE.
Ultra-cushioned Maximalist tactical boots. Designed with a larger "sweet spot" that aids in performance through the use of copious amounts of underfoot cushioning; dynamic midsole foams; and a modern profile & shape.

ULTRA CUSHIONING
25% - 55% more shock absorbant than other leading athletic tactical boots.

STACK HEIGHT
Engineered unique performance midsole geometrics that feature higher volume, softer density and greater rebounding foam than standard duty boots.

UNIFORMITY OF STRIDE
Rocker midsole geometry encourages smooth gait from heel-strike to toe-off providing a faster transition to the forefoot.

INCREASED STABILITY
Unique midsole design "frames" the foot by allowing the foot to sink deeply into the midsole to provide greater support and stability.

**Belleville offers many styles of boots that comply with the Berry Amendment which requires that 100% of the labor and 100% of the material costs come from the U.S.**

**Belleville offers boot styles that feature a VIBRAM® Foreign Object or Debris Resistant (FOD) outsole**

**Indicates that boot is waterproof**

**Indicates that the boot is insulated**

**GORE-TEX®** footwear provides durably waterproof protection that is highly breathable in a variety of climate conditions.

**VIBRAM®** soles are always produced with three objectives: to guarantee the best performance, the maximum level of comfort and quality over time.

**Gore® THERMIUM™** protectant barrier strategically placed in areas of boot to offer additional thermal insulation around the areas of the foot that tend to get the coldest the fastest.

**THINSULATE™** insulation by 3M maintains warmth even in damp conditions. This original “warm without bulk” product is not only exceptionally thin but is also extremely lightweight and durable.

**DuPont™ NOMEX®** is the fiber that’s engineered to stand up to excessive flame temperatures; therefore, provides superior heat and flame resistance which cannot be washed out or worn away.

**ULTRA-LITE®** is a polyurethane material created for lightweight, shock absorbing performance. This material is made up of a pure polyether system which provides excellent hydrolytic stability.

**HIGH PERFORMANCE ORTHOTIC INSOLE**

Advanced Anatomical Design includes a stabilizing contoured heel cup; extended arch support and honeycomb geometric forefoot to provide maximum air circulation. State-of-the-Art Materials include advanced EVA resin that forms the heel & mid-foot cradle, Agion® treated anti-bacterial sock liner and high tech EVA/Rubber blend for impact cushioning.

**HIGH CLEARANCE SAFETY TOES**

Each of our high-clearance steel and composite toes meet ASTM F2412-11 and F2413-11 standards for impact & compression and Electrical Hazard (EH) rated. Design extras, such as padding under and around the safety toe and our flange-anchored construction, provide both increased comfort and safety.

HOW TO CARE FOR YOUR BELLEVILLES

SUEDE LEATHER BOOTS
[Tan, Sage Green & Coyote]
- Remove dirt by brushing boots with a soft/medium bristle brush.
- Using a mixture of warm water and a mild detergent, lightly scrub the leather and nylon fabric with a soft brush to remove any excess dirt.
- Air dry boots naturally at room temperature. Do not expose boots to direct intense heat (such as a blow dryer) as this can cause damage to the boot.
- Do not polish.

SMOOTH LEATHER BOOTS
[Black & Chocolate Brown]
- Remove dirt by brushing boots with a soft bristle brush.
- Nylon fabric may be cleaned with a soft brush using warm water and a mild detergent. Do not polish nylon.
- Apply a light coat of quality polish to the leather and buff to a uniform appearance. Excessive polish may reduce boot breathability.
- Air dry boots naturally at room temperature. Do not expose boots to direct intense heat (such as a blow dryer) as this can cause damage to the boot.

SAGE GREEN MAINTAINER® BOOTS
- Wipe boot clean of excess, stuck-on dirt with a damp, clean towel.
- Wash dirty area with mild detergent and soft bristle brush. Allow to dry.
- Apply a sage green or neutral-color polish to 100% leather to maintain softness and restore natural luster.

SIZING TIPS & INFORMATION

All of our boots are available in Men’s Regular [R] and Wide [W] Widths, with some styles offering Narrow [N] and Extra Wide [XW] widths as well. Since sizes & widths vary among boot styles, please check individual boot styles for available sizes & widths.

Unfortunately, not all boot brands fit the same. For this reason, here are a few sizing tips that will help you get a better BELLEVILLE fit:
- **GET SOME BOOT SOCKS:** Try on the boots with a pair of boot socks that you will normally wear with the boots.
- **PLACE & LACE:** It is important that your foot is properly placed inside the boots when selecting a size. Proper foot placement requires that the lace is drawn snug at the bottom of the lacing system. This will prevent your foot from sliding forward too far and keep your heel properly placed against the back of the boot.
- **CHECK THE LENGTH:** Length-wise, when your heel is placed against the back of the boot, you should have a slight amount of room in the front of the boots to wiggle your toes.
- **CHECK THE WIDTH:** Width-wise, your boots should feel a little snug, but not tight.
- **TAKE A STROLL:** Walk around to see how the boots feel. Make sure your heel stays in place and not sliding up and down [this can cause blisters].
- **WOMEN’S SIZES:** Belleville does offer many boot styles that are specifically manufactured for women. All Belleville style numbers that begin with an “F” indicate a boot specifically designed and sized for women. If a particular style of boot is not available in women’s sizes, we recommend ordering the boot 2 full sizes smaller.

To improve the fit of the boot, try loosening or tightening the laces at different parts of the boot until you get the perfect fit.

**RETURN & EXCHANGE POLICY**

**RETURNS**
If for any reason you are not completely satisfied with the boots you purchased directly from us and would like a refund, return them unused to Belleville within 30 days from purchase and we’ll refund 100% of the price of the boots, excluding any shipping charges. For exchanges, we will pay to have a new pair shipped to you, but we will not reimburse you for the shipping cost to return the original pair.

Belleville Boot Company will not issue any refunds or exchanges on boots returned after the 30-day period, or that show any signs of wear or are altered in any way from their original condition. All footwear should be returned with postage prepaid and in its original packaging. COD shipments will NOT be accepted.

Belleville Boot Company guarantees its boots to be free of defects in materials and workmanship for one year from the date of purchase. If a defect in materials and/or workmanship occurs within the one-year period, Belleville will, at its option, either repair or replace the boots.

**BOOTS THAT ARE NOT CONSIDERED DEFECTIVE INCLUDE:**
- Boots that show signs of normal wear and tear or are damaged due to excessive wear
- Boots damaged by improper boot maintenance or lack of maintenance
- Boots that are of an incorrect size, but have been worn
- Boots returned after the return / warranty period

All defective footwear received will be inspected to determine eligibility for a refund, exchange or merchandise credit.

**Please note:** Belleville boots issued to you or purchased from any location other than Belleville direct must be returned to that issuing or selling agent and are subject to that agent’s return policy.
